DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Claims 11-20 are objected to for the following reasons:

In claim 11, second line from the end, the recitation of "to prevent air flow through that portion of the platen" appears inaccurate. The valve element contacts a portion of the platen to prevent air flow through **the aperture** associated with that portion of the platen. Air does not flow through the portion of the platen being contacted by the valve element. Accordingly, it is suggested that a phrase -- the aperture associated with -- be inserted after the word "through" so as to be clear of the structural requirement of the claimed invention. Similarly, a phrase -- the aperture associated with -- is also suggested to be inserted before the last phrase of the claim "the platen portion".

In claim 19, line 3, the word "response" should be changed to -- responsive -- to correct an apparent oversight.

Claims 1-10 appear to distinguish over the prior art of record and thus are allowed.

Claims 11-20, if revised to overcome the above objections, would also be allowed.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
